The flowchart illustrates the process of consolidation from a booking slip to create a Master Bill of Lading (MBL) or Master Air Waybill (MAWB). It is divided into three main sections: SYSTEM, USER, and APPROVER.

SYSTEM Section:

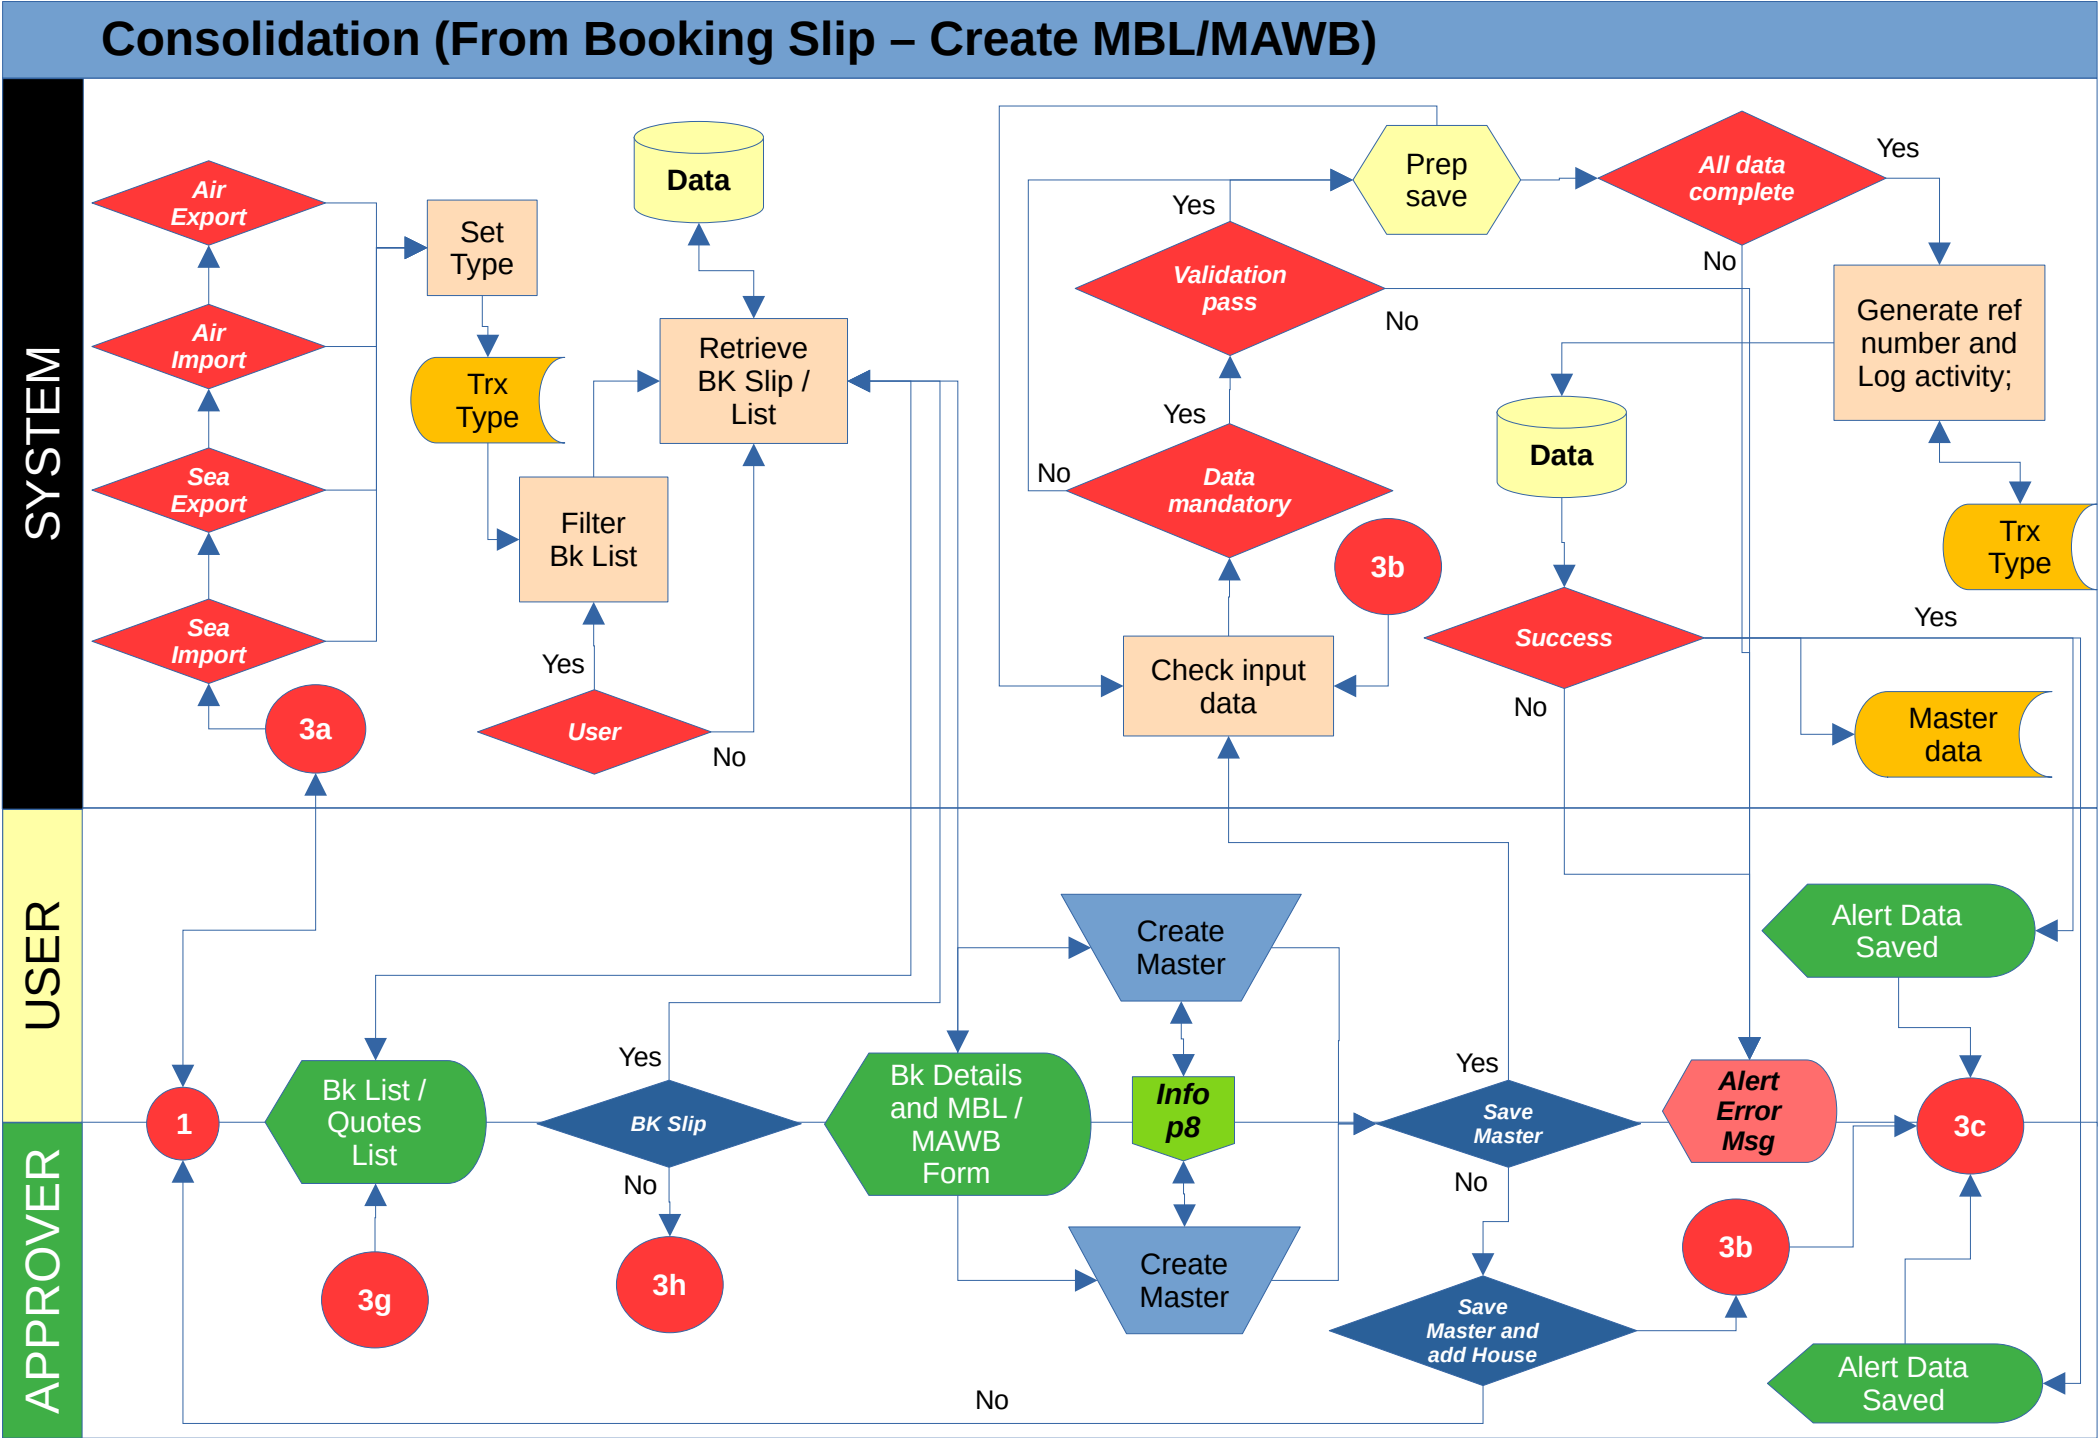

- Starts with a decision diamond for **Air Export**, **Air Import**, **Sea Export**, or **Sea Import**.
- Leads to a **Set Type** process, then a **Trx Type** data store.
- Proceeds to **Filter Bk List**, then a **User** decision diamond.
- If **User** is Yes, it goes to **Retrieve BK Slip / List**, then to a **Data** data store.
- If **User** is No, it goes to **Prep save**, then to an **All data complete** decision diamond.
- If **All data complete** is Yes, it goes to **Generate ref number and Log activity**, then to another **Trx Type** data store.
- If **All data complete** is No, it goes to **Success** decision diamond.
- If **Success** is No, it goes to **Master data** data store.
- If **Success** is Yes, it goes to **Check input data** process.
- Check input data** leads to a **Data mandatory** decision diamond.
- If **Data mandatory** is No, it goes to **Validation pass** decision diamond.
- If **Data mandatory** is Yes, it goes to **Check input data**.
- If **Validation pass** is Yes, it goes to **Prep save**.
- If **Validation pass** is No, it goes to **Check input data**.
- Prep save** leads to **All data complete**.

USER Section:

- Starts with a red circle **1**, leading to **Bk List / Quotes List** data store.
- Leads to a **BK Slip** decision diamond.
- If **BK Slip** is Yes, it goes to **Bk Details and MBL / MAWB Form** data store.
- If **BK Slip** is No, it goes to a red circle **3h**.
- Bk Details and MBL / MAWB Form** leads to **Create Master** process.
- Create Master** leads to **Info p8** data store.
- Info p8** leads to **Save Master** decision diamond.
- If **Save Master** is Yes, it goes to **Alert Error Msg** data store.
- If **Save Master** is No, it goes to **Save Master and add House** decision diamond.
- Save Master and add House** leads to a red circle **3b**.
- Alert Error Msg** leads to a red circle **3c**.
- 3b** and **3c** both lead to **Alert Data Saved** data store.
- Alert Data Saved** leads to another **Alert Data Saved** data store.
- Alert Data Saved** leads to a red circle **3g**.
- 3g** leads back to **Bk List / Quotes List**.

APPROVER Section:

- Starts with a red circle **1**, leading to **Bk List / Quotes List** data store.
- Leads to a **BK Slip** decision diamond.
- If **BK Slip** is Yes, it goes to **Bk Details and MBL / MAWB Form** data store.
- If **BK Slip** is No, it goes to a red circle **3h**.
- Bk Details and MBL / MAWB Form** leads to **Create Master** process.
- Create Master** leads to **Info p8** data store.
- Info p8** leads to **Save Master** decision diamond.
- If **Save Master** is Yes, it goes to **Alert Error Msg** data store.
- If **Save Master** is No, it goes to **Save Master and add House** decision diamond.
- Save Master and add House** leads to a red circle **3b**.
- Alert Error Msg** leads to a red circle **3c**.
- 3b** and **3c** both lead to **Alert Data Saved** data store.
- Alert Data Saved** leads to another **Alert Data Saved** data store.
- Alert Data Saved** leads to a red circle **3g**.
- 3g** leads back to **Bk List / Quotes List**.

Master Sea /Airway Bill of Lading Input

Sea Mandatory Fields

1. Registry No
2. Customs Office
3. Master BL
4. Place of Origin (pre-filled up)
5. Port of Pickup (pre-filled up)
6. Place of Destination (pre-filled up)
7. Port of Destination (pre-filled up)
8. Shipping Line/Airline (look up; pre-encoded)
9. Vessel No
10. Voyage No
11. Currency
12. ETD (estimated time of departure)
13. ETA (estimated time of arrival)
14. ETB (estimated time of berthing)
15. Shipment Remarks
16. Mode of Transport
17. Cargo Movement

Sea Pre - filled up Fields

1. Place of Origin (pre-filled up)
2. Port of Pickup (pre-filled up)
3. Place of Destination (pre-filled up)
4. Port of Destination (pre-filled up)
5. Mode of Transport
6. Cargo Movement
7. FWD Category

Sea Optional Fields

1. ER (exchange rate)

Sea Auto - Calculated Fields

1. Total HBL
2. Total HBL Package
3. Total HBL Grossweight
4. Total HBL Measurement

Air Mandatory Fields

1. Registry No
2. Customs Office
3. Master BL
4. Place of Origin (pre-filled up)
5. Port of Pickup (pre-filled up)
6. Place of Destination (pre-filled up)
7. Port of Destination (pre-filled up)
8. Airline (look up; pre-encoded)
9. Flight No
10. Currency
11. ETD (estimated time of departure)
12. ETA (estimated time of arrival)
13. Shipment Remarks
14. Mode of Transport
15. Cargo Movement

Air Pre - filled up Fields

1. Place of Origin (pre-filled up)
2. Port of Pickup (pre-filled up)
3. Place of Destination (pre-filled up)
4. Port of Destination (pre-filled up)
5. Mode of Transport
6. Cargo Movement
7. FWD Category

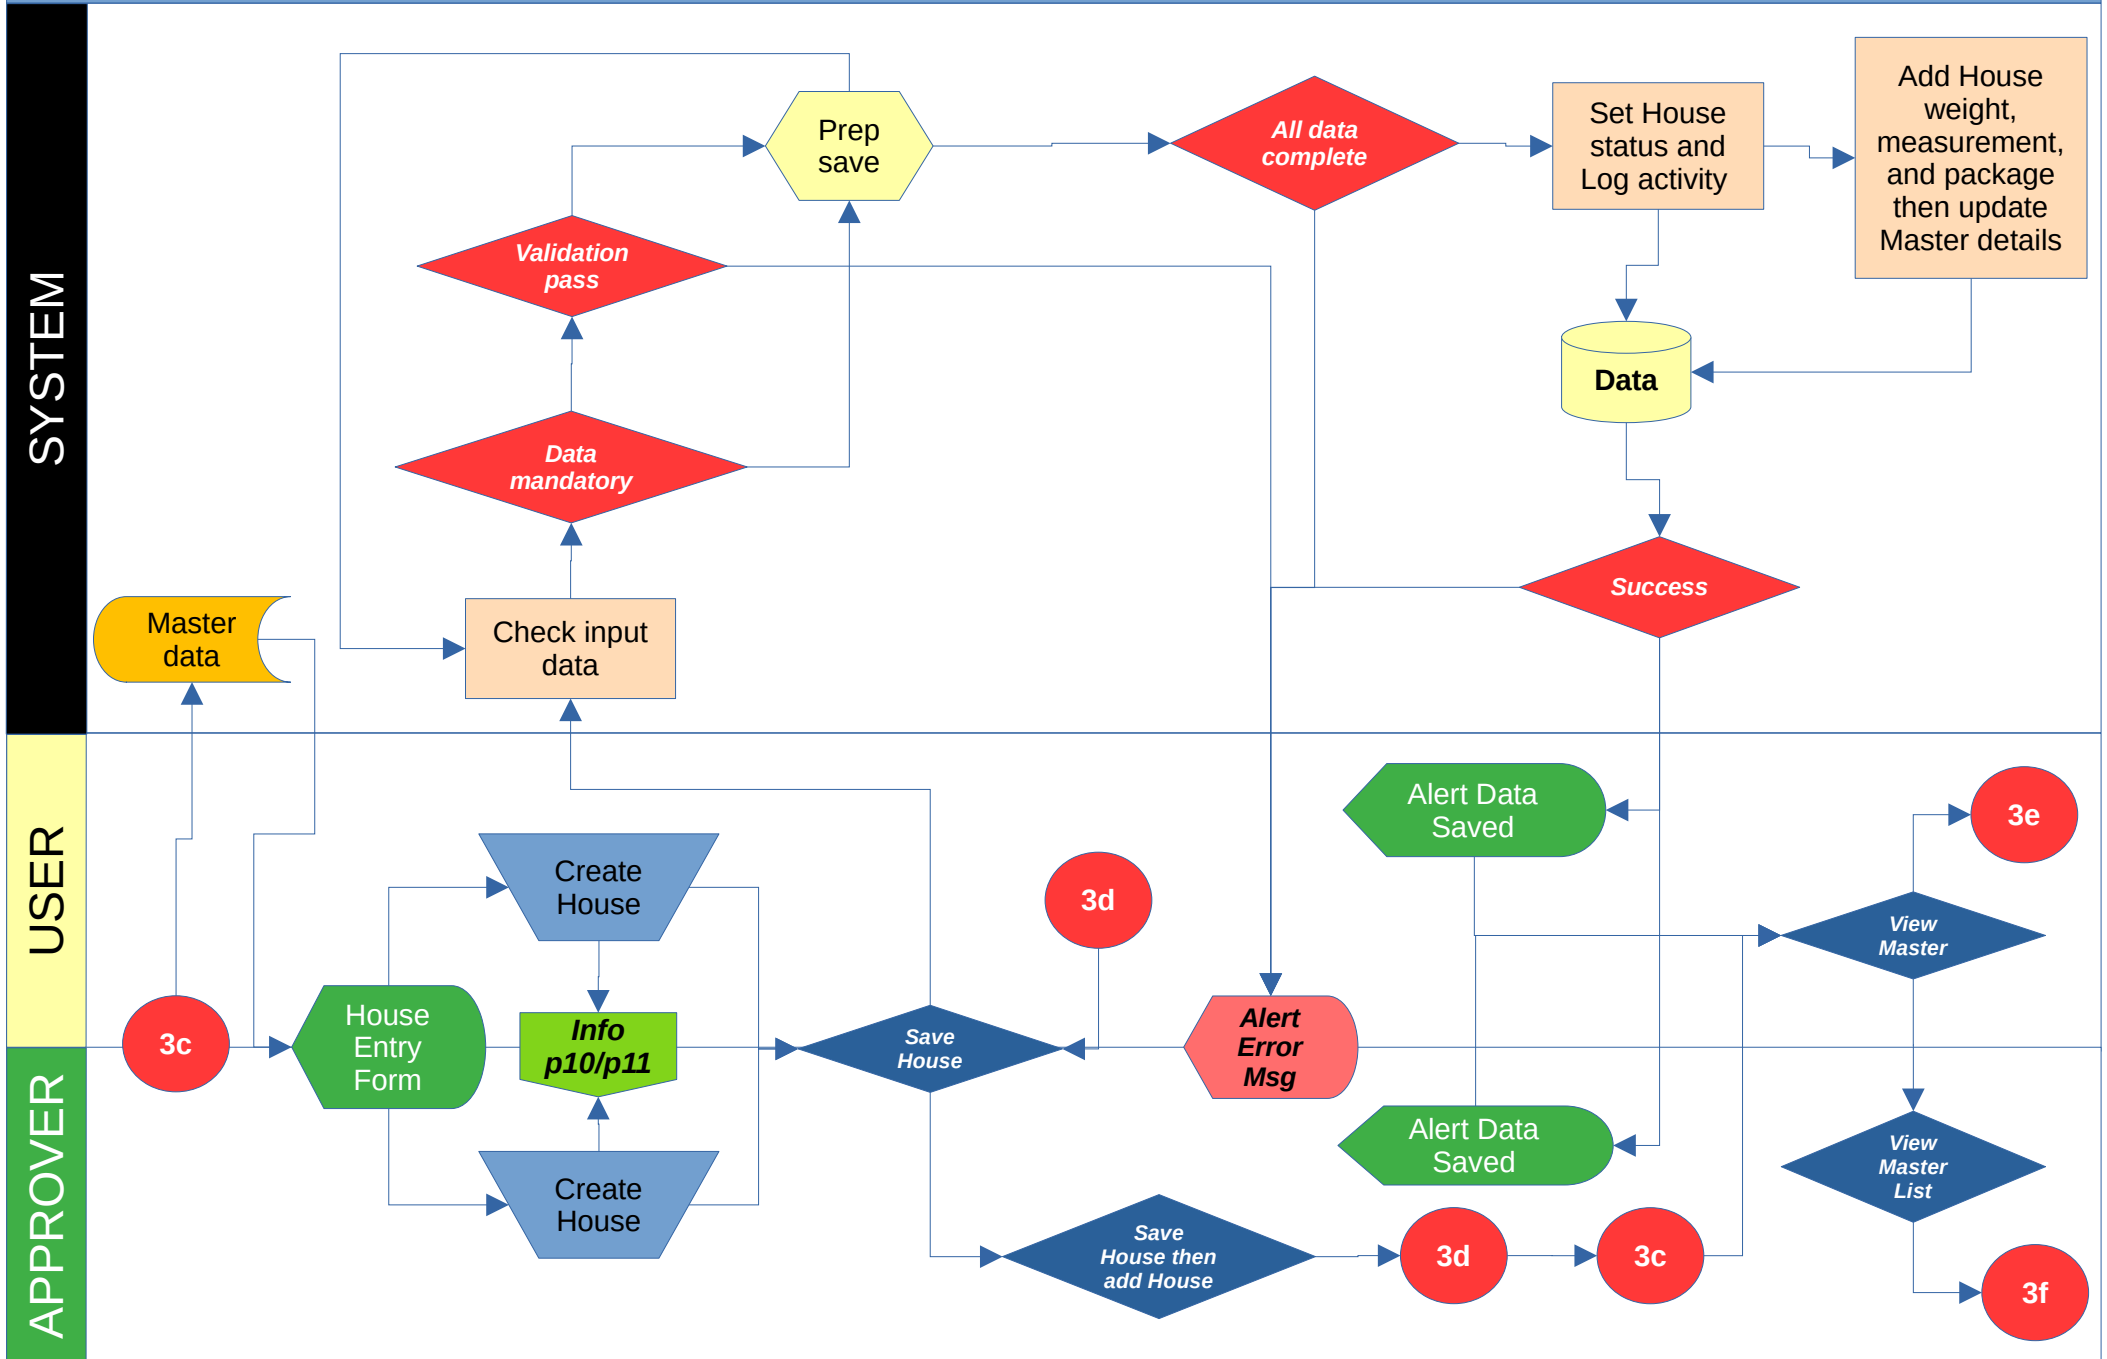

Air Optional Fields

1. ER (exchange rate)

Air Auto - Calculated Fields

1. Total HAWB
2. Total HAWB Package
3. Total HAWB Grossweight
4. Total HAWB Measurement

Consolidation (From Booking Slip – Create HBL/HAWB)

House Sea Bill of Lading Input

Mandatory Fields

1. HBL Nature
2. HBL Nature Code
3. Container Flag
4. Gross Weight
5. Measurement
6. Place of Origin (pre-filled up)
7. Port of Pickup (pre-filled up)
8. Place of Destination (pre-filled up)
9. Port of Destination (pre-filled up)
10. Packaging Label
11. Total Package
12. Description
13. Shipping Marks
14. Exporter Name
15. Address 1 (Exporter Address 1 – auto fill up upon selection of Exporter Name)
16. Consignee Name
17. Address 1 (Consignee Address 1 – auto fill up upon selection of Exporter Name)
18. Notify Name
19. Address 1 (Consignee Address 1 – auto fill up upon selection of Exporter Name)
20. Container Details (if Sea)
 - a. Container No.
 - b. Container Tyoe
 - c. EF Indicator
 - d. Mark of Seal [1]

Pre - filled up Fields

1. Address 1 (Exporter)
2. Address 1 (Consignee)
3. Address 1 (Notify)
4. Place of Origin (pre-filled up)
5. Port of Pickup (pre-filled up)
6. Place of Destination (pre-filled up)
7. Port of Destination (pre-filled up)

Optional Fields

1. Address 2 (Exporter)
2. Address 3 (Exporter)
3. Address 4 (Exporter)
4. Address 2 (Consignee)
5. Address 3 (Consignee)
6. Address 4 (Consignee)
7. Address 2 (Notify)
8. Address 3 (Notify)
9. Address 4 (Notify)

The flowchart illustrates the process for Consolidation (New DirectTransaction – House BL/AWB Entry). It is divided into three main sections: USER, SYSTEM, and APPROVER.

USER Section:

- The process starts with a red circle labeled **3j**.
- The user enters **Create House Details** (blue trapezoid).
- The user enters **Info p20/p21** (green hexagon).
- The user enters **Create House Details** (blue trapezoid) again.
- The user enters **Save House** (blue diamond).

SYSTEM Section:

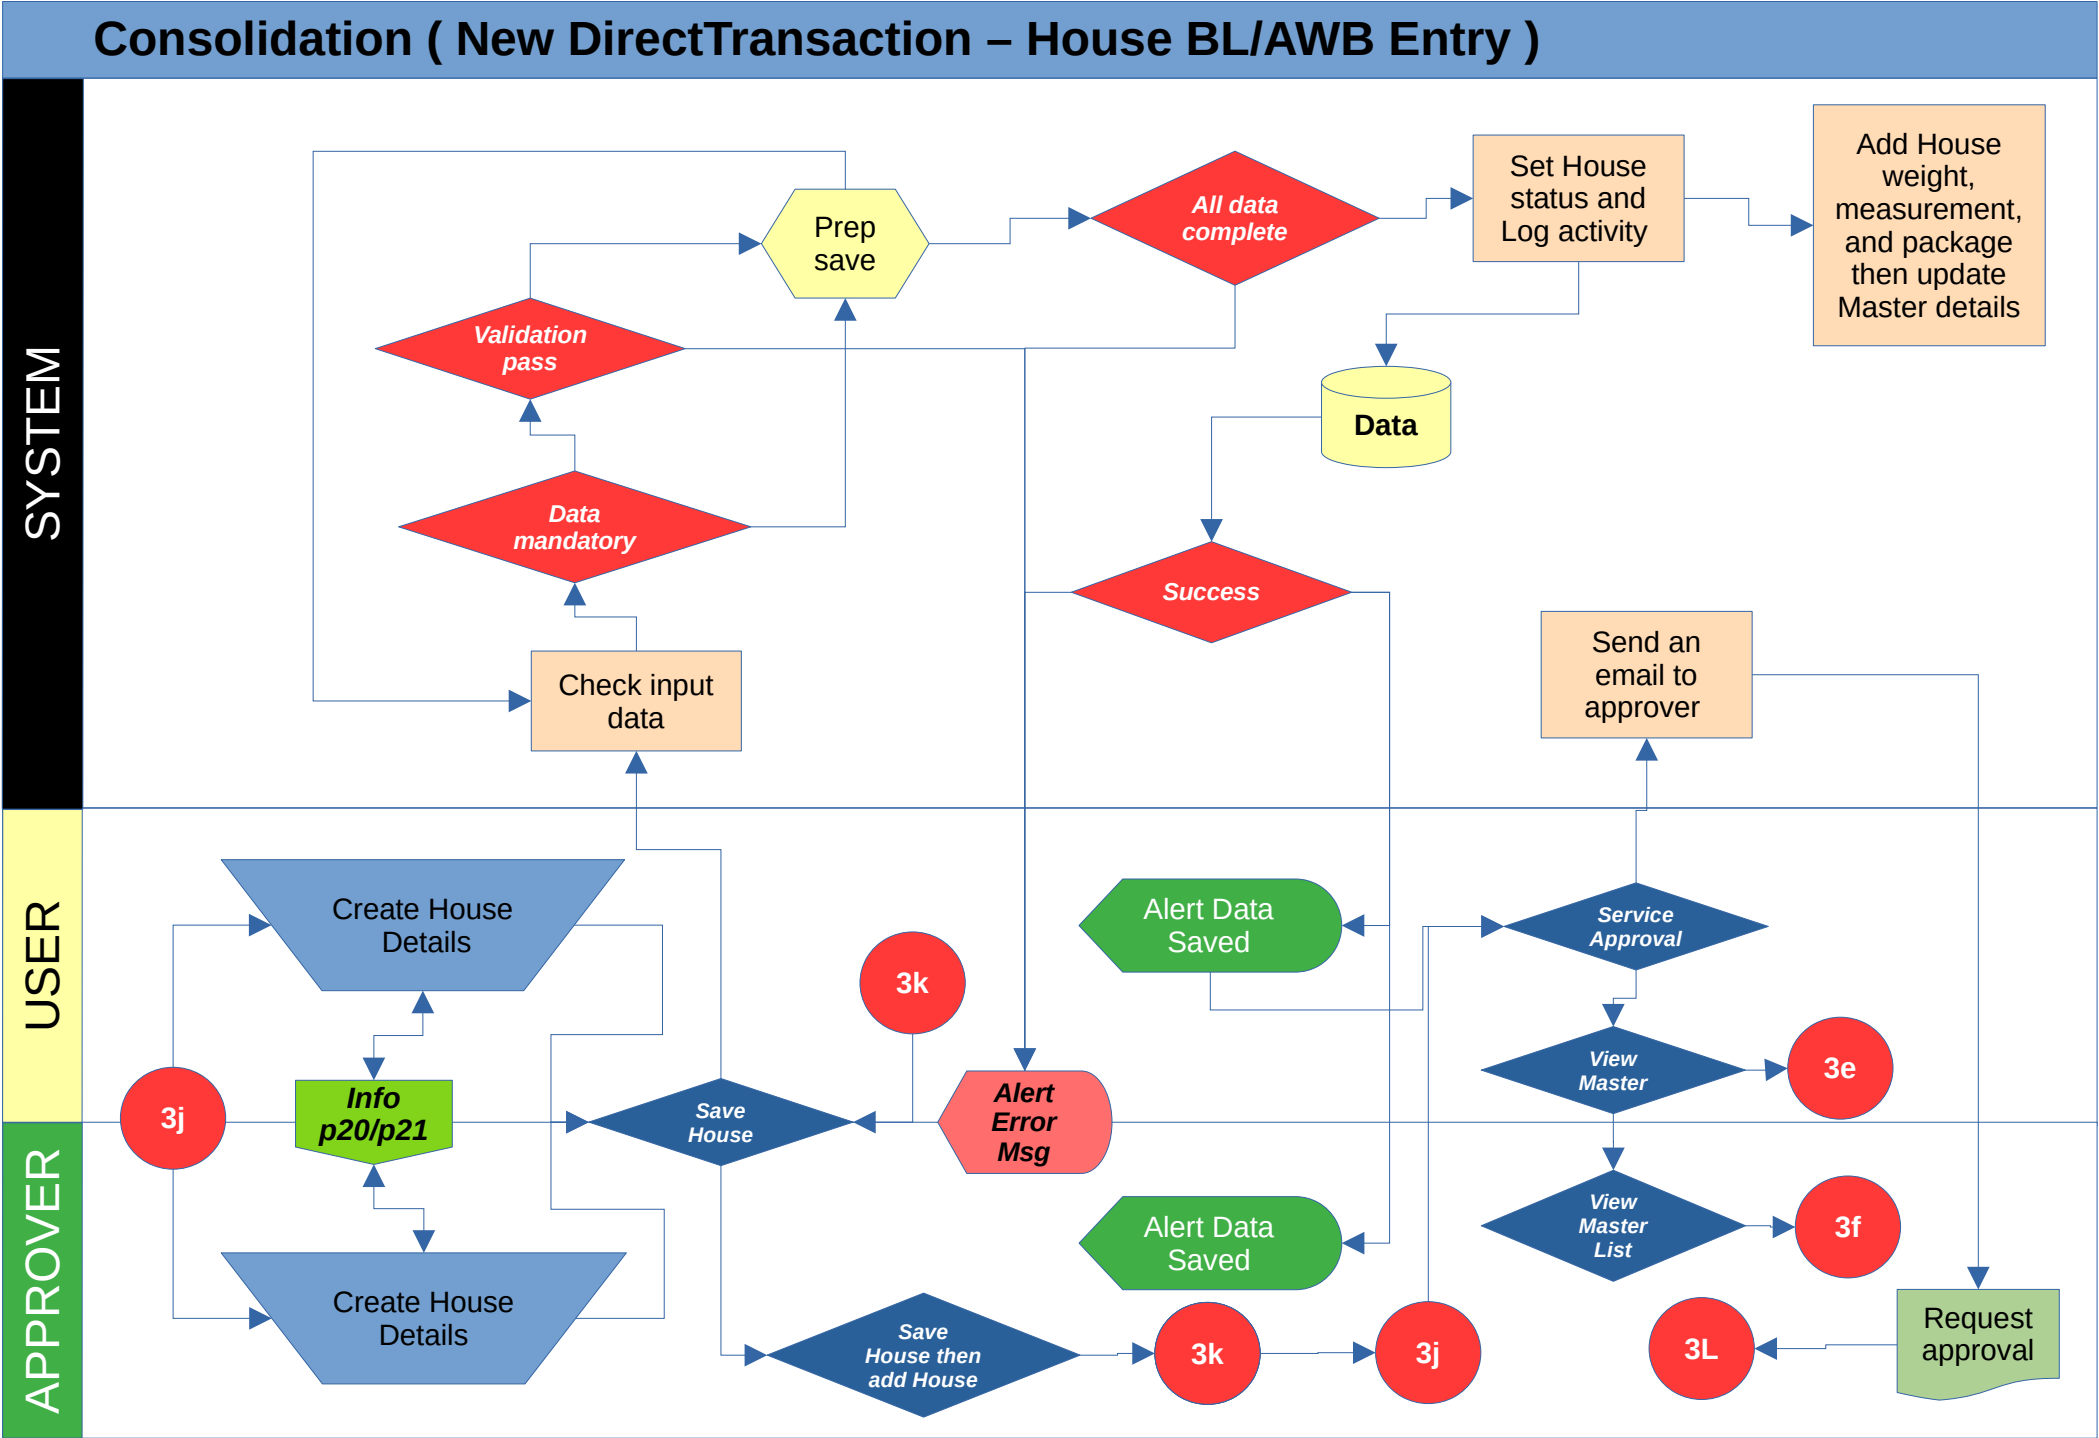

- The process continues to **Check input data** (orange rectangle).
- The process continues to **Data mandatory** (red diamond).
- The process continues to **Validation pass** (red diamond).
- The process continues to **Prep save** (yellow hexagon).
- The process continues to **All data complete** (red diamond).
- The process continues to **Set House status and Log activity** (orange rectangle).
- The process continues to **Add House weight, measurement, and package then update Master details** (orange rectangle).
- The process continues to **Success** (red diamond).
- The process continues to **Alert Data Saved** (green hexagon).
- The process continues to **Service Approval** (blue diamond).
- The process continues to **View Master** (blue diamond).
- The process continues to **3e** (red circle).
- The process continues to **View Master List** (blue diamond).
- The process continues to **3f** (red circle).
- The process continues to **Send an email to approver** (orange rectangle).
- The process continues to **Request approval** (green rectangle).
- The process continues to **3L** (red circle).

APPROVER Section:

- The process continues to **3L** (red circle).
- The process continues to **3j** (red circle).

Other Elements:

- 3k** (red circle) is connected to **Alert Error Msg** (red hexagon) and **Alert Data Saved** (green hexagon).
- Alert Error Msg** (red hexagon) is connected to **Check input data** (orange rectangle).
- Alert Data Saved** (green hexagon) is connected to **Service Approval** (blue diamond).
- 3e** (red circle) is connected to **Send an email to approver** (orange rectangle).
- 3f** (red circle) is connected to **Request approval** (green rectangle).
- 3L** (red circle) is connected to **Request approval** (green rectangle).
